# SUBJECT INDEX, VOLUME 63, 1970*

A

Abate against: *Attagenus* spp., 286
*Aedes nigromaculis*, 1225
beetles, 259
body lice, 861
dark rice field mosquito, 1986
Douglas-fir tussock moth, 514
*Hippelates*, 1187
*Abbottana clemataria*, 872
Absorption and translocation of insecticides in broccoli, 781
AC-12008 against green peach aphid, 781
AC-12415 against fruit flies, 1746
AC-13462 against apple insects, 182
AC-17413 against apple insects, 182
AC-43064 as soil insecticide, 2
AC-47031: against cotton leafworm, 610
as soil insecticide, 2
AC-47470: against corn pests, 387
as soil insecticide, 3
*Acalitus vaccinii*, 74
Acaricide (s): relationships between temperature and toxicity of, 1
toxicity to ladybird beetle, 1686
Acarina, 74, 181, 221, 293, 298, 299, 308, 340, 357, 373, 377, 504, 545, 567, 638, 651, 722, 822, 850, 1006, 1027, 1194, 1214, 1408, 1433, 1439, 1528, 1547, 1551, 1590, 1617, 1631, 1635, 1672, 1675, 1681, 1709, 1717, 1755, 1855, 1876, 1885, 1989, 1996, 1999
Accothion, toxicity to cotton insects, 1568
ACD-7029 against Douglas-fir tussock moth, 514
ACD-10101 against mites, 1410
*Aceratagallia calcaris*, biology and relationship to sugarbeet disease, 460
*californica*, 1060
*sanguinolenta*, 1060, 1992
*Aceria medicaginis* on alfalfa, 293
*sheldoni*, 1006
*Acheta domesticus*, sensitivity to Gamma rays, 114
*pennsylvanicus*, 783
*Acrobasis vaccinii*, 1678, 1701
*Acrosternum hilare*, 200, 1423
*Actias luna*, 872
*Aculops pelekassi*, 1409, 1755
*Aculus schlechtendali*, 766, 1521
*Acyrthosiphon pisum*, 192, 1058, 1100, 1486, 1589
*porosum*, 1100
*solani*, 1100
*Adalia bipunctata*, 531, 896
Adaptation of laboratory-reared screwworms, 1381
*Adelges cooleyi* control, 150
*Adelphocoris lineolatus*, 1542, 1995
Adjuvants prolonging residual activity, 477
*Aedes aegypti*, 91, 434, 649, 974, 1118, 1128, 1173, 1473, 1576, 2002
inhibition of male accessory glands, 745
ovitrap paddles in surveillance, 1013
probing response, 974, 2009
skin repellents against, 1203
*Aedes alboscutellatus*, 1207
*assamensis*, 1207
*imprimens*, 1207
*lineatopennis*, 1207
*mediolineatus*, 1207
*melanimon*, 483, 1472
*nigromaculis*, 480, 1173, 1472
*nigromaculis*, insecticide resistance in 1224
*sierrensis*, 1173
*stimulans*, 649
*taeniorhynchoides*, 1207
*triseriatus*, 1173
*vexans*, 1207
*Aelothrips* sp., 765
Aerosol (s) against Mexican fruit fly, 1772
application of lepidopterous eggs, 1033
*Agallia constricta*, 1992
*Agapostemon splendens*, 1445
*texana*, 1445
*virescens*, 1445
*Agathis binominata*, 1137
sp., 102
Age effect on nymph susceptibility of lone star tick, 1681
*Ageneotettix deorum*, 1210
*Agria affinis* nutrient level relation to larvae, 449
Agritox against alfalfa weevil, 1603
*Agromyza vicifoliae*, 1337
Agromyzid alfalfa leaf miners and parasites, 1337
*Agrotis ipsilon*, 519, 1325, 1696
*orthogonia*, 1842
*Ahasverus advena*, 594, 729
Air barriers for house fly entrance, 29
Akton against: *Aedes nigromaculis*, 1225
bean and alfalfa bugs, 58
*Brachyrhinus*, 1684
cole crop pests, 864
*Alabama argillacea*, 519
Aldicarb, fate in soil, 1283
residues, 1317
Aldicarb against: aphids, 188
birch leaf miner, 1206
black vine weevil, 1699
boll weevil, 528
cabbage maggot, 1655
citrus red mite, 651, 1590, 1631
*Conotrachelus hicoriae*, 2011
*Daphnia*, 711
greenhouse whitefly, 523
leafhoppers, 1487
lygus, 1487
Mexican bean beetles, 1221
Nantucket pine tip moth, 1206
nematodes 187
potato beetles, 188
spirea aphid, 1206
spittlebug, 717
spruce gall aphid, 151
thrips, 937, 1254, 1487
tomato pinworm, 1482
*Aldrichina grahami*, 86
Aldrin, as soil insecticide, 3
direct-contact spray, 783
effect on cockroach nerves, 1732
in soils, 634
induction of metabolism of by house fly, 1092
inhibition of expoxidation, 1810
residues in sugarbeets, 1143
tolerance in corn rootworm, 1318
Aldrin against: black vine weevil, 1699
bluegrass billbug, 25
bollworm, 1569
*Brachyrhinus*, 1685
flea beetle, 1026
house fly, 471
*Lachnosterna consanguinea*, 1663
tobacco budworm, 1569
Aldrin + photoheptachlor against house fly, 473
Aldrin + sesamex against house fly, 472
*Aleyrodes spiraeoides*, 1378
Alfalfa, abundance and parasites of leaf miners of, 1623
diazinon metabolism in, 874
environment and resistance of, 1198
evaluation for resistance to alfalfa weevil larvae, 652
forage insects on, 1542
insect control on, 58
*Lygus hesperus* in, 1111
microscopic mites on, 293
nutrients and resistance to aphids, 938
plant injury and resistance, 1995
potato leafhopper on, 1077
related plants, alfalfa weevil feeding response to, 302
sampling alfalfa weevil populations on, 1329
screening clones, 682
Supracide and carbofuran residues in, 589
varieties to control three-cornered alfalfa hopper, 979
weather and insecticide effect on, 189
Alfalfa resistance to: leafhoppers, 1464
spotted alfalfa aphid, 964
Alfalfa hay, alfalfa weevil control on, 1374
insects, interrelationships among aphids, 192
leaf miners and parasites, 1337
Alfalfa weevil, *Bathyplectes anurus* parasite of, 586

*Compiled by Gladys O. Visel

competition between endoparasites, 719
control, 119, 440, 554, 1330, 1602
feeding behavior of larvae, 1689
feeding response to plant species, 302
flight behavior, 1010
hibernation and estivation habits, 347
insecticide susceptibility, 1268
machine for sampling populations, 1329
mating behavior, 928
mating preference, 674
*Microctonus aethiops* recovery from, 681
oviposition technique, 761
phorate against, 1374
population dynamics of eggs, 242
populations measuring, 1663
predicting spring hatch, 921
resistance of larvae, 652
screening alfalfa clones to resist larvae, 682
temperature and male presence effects on oviposition, 897
weather and insecticides effect on, 190
Aliphatic acids to attract yellow-fever mosquitoes, 2002
amines for mosquito control, 1472
Allethrin, against Douglas-fir tussock moth, 514
induction of metabolism of by house fly, 1092
*Allium sativum*, mosquito control with, 1172
*Allocoris pulicaria*, 102
*Allographta obliqua*, 531
Alodan against lone star tick, 1681
*Alphitobius diaperinus*, 80, 413, 594
*laevigatus*, 594
*Alsophila pometaria*, 1970
Aluminum-foil packages, insect penetration, 653
*Alypia octomaculata*, 872
*Amathes c-nigrum*, 972
*Amblyomma americanum*, 504, 1214, 1681
*maculatum*, 1547
*Amblyseius fallacis*, evaluation, 1876
*hibisci*, parathion resistance in, 1999
American cockroach, nicotine and neural synaptic transmission in, 62, 67
parathion activating microsomes, 31
elm, systemics in, 824
foulbrood disease, tylosin to control, 204
American Cyanamid (see AC, CL, EI)
Amidithion against sawflies, 622
Amino acid analogues as inhibitors, 1950
Aminocarb against: *Daphnia*, 711
tobacco flea beetle, 510
tussock moth, 514
*Ampeloeca myron*, 872
*Amphimallon majalis*, 23, 168
*Amphipyra*, 1562
*Amphitornus coloradus*, 1210
*Amphophora* sp., 1101
*Anabrus simplex*, 96
*Anagasta kuehniella*, 519, 595, 727
*Anagrapha falcifera*, 972
*Anaphes flavipes*, 1968
container for releasing, 675
development in cereal leaf beetle eggs, 128
*Anarsia lineatella*, 1551
*Anastatus* sp., 1023
*Anastrepha ludens*, 379, 1354, 1772
*mombinpraeoptans*, 1354
*Anatis quindecimpunctata*, 532, 896
*Andrena carlini*, 1445
*dunningi*, 1445
*hippotes*, 1445
*tridens*, 1445
Angoumois grain moth, and corn breeding, 1255
diet for rearing, 844
irradiation, 1241
Animal systemic insecticides, evaluation, 1103
to control common cattle grub, 1233
*Anisota*, 1613
*rubicunda*, 872, 1613
*stigma*, 872
Announcement: Annual Meeting, 1970, 983
*Anoecia oenotherae*, 1100
*Anopheles aconitus*, 1207
*albimanus*, 91, 1473
*albimanus*, ovicides for, 1151
*annularis*, 1208
*balabacensis*, 1207
*barbirostris*, 1207
*hyrcanus*, 1208
*karwari*, 1208
*maculatus*, 1207
*minimus*, 1207
*nigerrimus*, 1207
*pharoensis*, sterilization by metepa, 1169
*philippinensis*, 1207
*separatus*, 1208
*sinensis*, 1207
*splendidus*, 1207
*stephensi*, longevity in cylinders, 1984
*subpictus*, 1208
*tessellatus*, 1207
*umbrosus*, 1208
*vagus*, 1207
Anoplura, 861
*Anthereae pernyi*, 1343
*polyphemus*, 872
*Anthocoris musculus*, 765
*Anthonomus eugenii*, 102
*grandis*, 147, 266, 366, 499, 502, 507, 596, 646, 751, 754, 814, 848, 990, 1064, 1071, 1084, 1195, 1219, 1283, 1324, 1342, 1373, 1505, 1568, 1599, 1638, 1646, 1706, 1712, 1906
*Anthrenus* spp., 594, 729
*vorax*, 1011
Antifertility effects of iodine in screwworm flies, 1851
*Anuraphis maidiradicis*, 1100
sp., 1101
*Anystis agilis*, 765
*Aonidiella aurantii*, 1998
*Apamea interoceanica*, 972
*Apanteles dignus*, 1533
*glomeratus*, 304, 821, 1994
*marginiventris*, 1761, 1964, 1994
*militaris*, 327
*rubecula*, 821, 1994
introduction into U. S., 304
mutilation of imported cabbageworm by, 1114
rearing, 1993
*Apanteles scutellaris*, 1533
*subandinus*, 102
*Apatelodes torrefacta*, 872
*Aphaereta pallipes*, 748
*Aphelinus mali*, 532, 914
*nigritus*, 733
*varipes*, 733
Aphid (s), and alfalfa, 192
and their enemies, 530
collecting with sticky trap, 998
determining over reflective surfaces, 1350
dichlorvos tool in control of, 2011
dispersal from clover to beans, 1057
from corn fields, 1099
measuring populations, 1159
resistance in *Solanum* spp., 110
spread of bean yellow mosaic by, 1057
Aphid cages, dialyzing membrane for, 1032
transmission of virus, temperature effects on, 484
*Aphidoletes cucumeris*, 532
*Aphis coreopsidis*, 1100
*craccivora*, 1100
*fabae*, 1100, 1177
*gossypii*, 366, 484, 1100, 1219, 1999
*pisum*, 1101
*pomi*, 182, 530, 914, 1522
*rubifolii*, 1100
sp. 1101
*spiraecola*, 1100, 1205
*Aphodius cuniculus*, 1023
*fimetarius*, 1023
*haemorrhoidalis*, 1023
*lividus*, 1023
*vittatus*, 1023
Apholate, against tobacco budworm, 984
sterilization of *Musca sorbens* by, 1167
treatment of male accessory glands of *Aedes aegypti*, 745
*Aphomia gularis*, 595
*Aphytus lignanensis*, 102
*Apis mellifera*, 78, 102, 148, 204, 215, 327, 416, 475, 641, 714, 1062, 1350, 1437, 1442, 1539, 1831, 1834
Apple, codling moth control on, 1521
pest control, toxicity of compounds common to, 1528
Apple (s), thinning: extending life of, 306
puncturing to rear borer, 307
trees, damage to by codling moth, 1003
trees, insect control on, 181
Apple aphid, control on apple, 181
Apple maggot, control by fumigants, 496
dimethoate sprays for, 764
infestation of sour cherries, 294
infesting apricots, 1684
population reductions, 1878
red spheres and yellow panels to attract, 466
Apricots, apple maggot infesting, 1684
*Araecerus fasciculatus*, 729
Aramite against: *Eriophyes insidiosus*, 1552
*Typhlodromus occidentalis*, 1529
Araneida, 1844
*Archips argyrospilus*, 970
*griseus*, 970
*mortuanus*, 970
*semiferanus*, 970
*Archytas apicifer*, 1023
Argentine ant, foraging behavior, 740
*Argyroploce leucotreta*, 971
*Argyrotaenia citrana*, 1004, 1788
*juglandana*, 970
*quadrifasciana*, 970
*quercifoliana*, 970

*velutinana*, 181, 338, 370, 971, 1162
*verruca*, 1334
*Armigeres subalbatus*, 1207
Arthropod, grease-film extraction of, 1323
hormones to control livestock, 878
portable platforms for feeding, 312
seasonal incidence of major, 814
predators, poultry-manure-removal influence on, 82
Artificial infestation of corn, 443
*Asaphes lucens*, 733
*Asca citri*, 78
*Asphidencyrtus aphidivorus*, 733
*Asphondylia* sp., 1023
Asynchrony, insect control through, 1966
*Ataenius platensis*, 1023
*Atherigona varia*, 1715
*Athysanus argentarius*, 1542
Atmosphere, water vapor sorption from, 1069
Atmospheric gases and temperature, 570
*Atomosia melanopogon*, 1023
*Atrometus clavipes*, 1137
*Attagenus alfierii* and *A. megatoma*, susceptibility, 286
*megatoma*, 71, 1263, 1980
spp., 594
Attractancy of lures for Japanese beetle, 663
Attractant (s) for: cabbage loopers, 1417
*Gnathotrichus sulcatus*, 1014
Japanese beetles, 832
*Attractomus mali*, 765
*Aulacophora foveicollis*, feeding behavior on cucurbitacin, 333
*Aulocara elliotti*, 1210
Autochemosterilization of mosquito, 648
*Autographa ampla*, 972
*biloba*, 972
*californica*, 519, 972
Automatic data processing and forest-insect surveys, 1181
*Automeris io*, 872
Azaleas, new pest of, 335
Azinphosmethyl, in soils, 432
pink bollworm moths susceptibility to, 1941
Azinphosmethyl against: alfalfa weevil, 120, 190, 1268
apple insects, 182
bean and alfalfa bugs, 60
boll weevil, 266, 500, 503, 1342
*Brachyrhinus*, 1685
cabbage aphid, 319
cabbage looper, 667
cat-facing, 1026
clover head weevil, 257
codling moth, 895, 1458
cotton leaf perforator, 1365
*Eriophyes insidiosus*, 1552
fruit flies, 1748
greenbug, 1930
greenhouse whitefly, 523
ladybird beetle, 1687
*Sciopithes obscurus*, 1700
spittlebug, 718
sweetclover weevil, 1356
tobacco flea beetle, 510, 1340
tomato pinworm, 1481
tussock moth, 514
*Typhlodromus fallacis*, 1441
*Typhlodromus occidentalis*, 1530
Azinphosmethyl + methyl against Colorado potato beetle, 2007
Azinphosmethyl + methyl parathion against cotton insects, 849
Azinphosmethyl + Volck Supreme oil against codling moth, 1460
Azodrin against: citrus red mite, 1590
cole crop pests, 863
*Diatraea grandiosella*, 1496

B

B-10095 against house flies, 276
B-10341 against house flies, 276
B-11110 against mites, 1411
B-11163 against mites, 1141
*Bacillus thuringiensis*, 603, 1503, 1531, 1738
control by diet and house fly larvae, 1987
effect on pink bollworm, 1828
*Bacillus thuringiensis*, against: cabbage looper, 667
against corn earworm, 415
against tobacco budworm and bollworm, 1357
Back rubbers, use on cattle for fly control, 1123
Bagworm, radiography to facilitate egg counts, 910
Baits, and attractants for slugs, 1919
insecticides in to control house flies, 2000
*Balclutha abdominalis*, 1992
*hasta*, 1060
Banol against tussock moth, 514
BASF I–155 against body lice, 861
*Bathyplectes anurus*, 586
value of jumping cocoons to, 586
*Bathyplectes curculionis*, 440, 554, 586
alfalfa weevil control effects on, 119
competition with *Tetrastichus incertus*, 719
feeding of alfalfa weevil larvae parasitized by, 1689
*"Battaristis"* sp. nr. *nigratomella*, 971
Bay S–2758 against cotton insects, 463
5170 against cotton leafworm, 610
5621 against cotton leafworm, 612
Bay 5638 against: cotton leafworm, 610
*Spodoptera littoralis*, 677
Bay S–7182 against cotton insects, 463
16948 against fruit flies, 1746
19596 against fruit flies, 1746
Bay 22408 against: face fly, 1272
fruit flies, 1746
23453 against cotton insects, 463
Bay 25141 against: lepidopterans, 1943
tussock moth, 514
Bay 25142 against lepidopterans, 1943
25198 against lepidopterans, 1943
Bay 33051 against: bean and alfalfa bugs, 58
house flies, 275
mites, 1410
Bay 37289 against: alfalfa weevil, 120
bean and alfalfa bugs, 58
black vine weevil, 1699
*Brachyrhinus*, 1684
cabbage pests, 320, 667, 1654
citrus red mite, 1590
cutworms, 606
garden symphylan, 1718
*Pleocoma*, 1574
seed-corn maggot, 1332
spittlebug, 716
tussock moth, 514
Bay 37341, direct-contact spray, 783

*Sciopithes obscurus*, 1699
Bay 42688 against cattle grubs, 1103
44526 against mites, 1410
49854 against mites, 1410
52553 against southern potato wireworm, 512
52957 against southern potato wireworm, 512
58733 against mites, 1410, 1434
Bay 62863 against: body lice, 861
house flies, 275
lepidopterans, 1943
mites, 1410
Bay 65258 against: bean and alfalfa bugs, 58
cotton insects, 464
mites, 1410
Bay 68138 against: *Brachyrhinus*, 1684
cabbage maggot, 1654
Bay 69136 against mites, 1410
69588 against mites, 1410
Bay 77488 against: beetles, 259
cabbage aphid, 320
house flies, 275
Bay 78182 against: beetles, 259
house flies, 275
Bay 80833, against house flies, 275
direct contact spray, 783
Bay 85032, direct-contact spray, 783
88991, direct-contact spray, 783
Bay 93820 against: *Aedes nigromaculis*, 1225
*Brachyrhinus*, 1684
Colorado potato beetle, 2007
cotton leaf perforator, 1365
flea beetle, 1026
Baygon against: bluegrass billbug, 25
clover head weevil, 257
spruce gall aphid, 151
tussock moth, 514
Bean (s), insect control on, 58, 1486
mite control on, 1486
Bean leaves treated with metal chelates, 722
Bean yellow mosaic spread by aphids, 1057
Bee age and bee mortality, 1437
Beef cattle, fly control on, 1123
Beet leafhopper, control and suppression of curly top and beet western yellows, 493
vector of curly top virus, 1321
Beet western yellows suppression, 493
Beetles, water vapor sorption from atmosphere in larvae, 1069
Behavior (see Methods)
*Bembidion quadrimaculatum*, 935
*Bemisia tabaci*, 629
Benzene hexachloride against house flies, 1949
Benzomyl against Pacific spider mite, 308
Bermudagrass, resistance affecting fall armyworm control, 1981
BHC effect on cockroach nerves, 1732

Biology and rearing of *Euchromius ocelleus*, 1677
Biology of: *Aceratagallia calcaris*, 460
blueberry bud mite, 74
bluegrass billbug, 24
*Cosmobaris americana*, 38
*Eurytoma amygdali*, 1934
*Exorista flaviceps*, 837
Bionomics of green fruitworms, 1562
Biotrol against budworms, 580
Biotypes of spotted alfalfa aphid, 1822
Birch leaf miner, insecticides against, 1205
Birlane against corn pests, 387
Black blow fly, fate of TMAC in, 455
saline solution for, 1006
Black cutworm, rearing, 1325
Black turpentine beetle, chemical control, 104
Black vine weevil, carbofuran against, 1698
Blackfly larvae, decreased susceptibility of, 218
Blacklight lamps, forest insects captured in traps equipped with, 871
on traps against lepidopteran larvae, 1974
traps equipped with, 141
*Blattella germanica*, 102, 350, 429, 795, 883, 1674, 1731
*orientalis*, 431
Blueberry bud mite, biology, 74
casebeetle, survival, 1364
maggots, control by fumigants, 496
Bluegrass billbug control, 23
Body lice, sleeve tests for control of, 861
*Boettcherisca peregrina*, 19
Boll weevil, attraction to cotton plants, 990
Boll weevil control: in cotton, 848
with male-baited traps, 1041
with spray and droplets, 365
Boll weevil, cotton plant cell wall enzymes of, 1712
dimethyl sulfoxied as synergist against 1342
dispersal, 1706
eliminating *Glugea gasti* from, 1638
exposed to sublethal doses of systemic insecticides, 527
in isolated plots, 1646
methyl parathion, DDT, and toxaphene effects on, 596
mite on, 646
nutrition and host preference, 753
organophosphorus poisoning in, 499, 502
overwintering, 1906
population (s) , 1084
population analysis, 1505
protozoan toxicity to, 266
response to oils of plants, 751
sterilization, 1064, 1195
survival, soil-surface temperature effect on, 1599
winter survival, 1071
Bollworm, *Bacillus thuringiensis* against, 1357
control in cotton, 848
cotton diets of, 1965
damage to cotton, 1328
fats and insecticide susceptibility, 1430
gossypol in diet, 1544
mating, 1228
methyl parathion, DDT, and toxaphene effects on, 596
molasses as spray additive for control, 766
parasitism of eggs, 686
*Bombus bimaculatus*, 1445
*fervidus*, 1445
*griseocollis*, 1445
*impatiens*, 1445
*terricola*, 1445
*Bombyx mori*, 334, 661, 994
Bomyl against alfalfa weevil, 120
Bovine droppings, insects associated with, 1023
*Brachycaudus helichrysi*, 1058
*Brachycaudus* sp., 1100
*Brachyrhinus ovatus* and *B. sulcatus*, insecticide tests against, 1684
*sulcatus*, 1698
*Bracon gelechiae*, 1137, 1533
*hebetor*, 1348
*mellitor*, 1137
sp., 1023
Braconid, parasite, adaptation to face fly, 748
reproduction, 1348
*Brevicoryne brassicae*, 319, 601, 665, 862, 1100
*Brevipalpus phoenicis*, injury to citrus by, 1996
Broccoli, absorption and translocation of insecticides in, 781
garden symphylan control in, 1718
Bromide in hay bales, 900
Bromophos, as soil insecticide, 3
reaction of Styrofoam, 998
toxicity to confused flour beetle, 1000
Bromophos against: *Aedes nigromaculis*, 1225
cotton leafworm, 611
flea beetle, 1026
house fly, 1925, 2001
tussock moth, 514
Bromophos-ethyl against house flies, 2001
Brood as index of pollinators, 148
Brood-rearing capability of honey bees, 215
*Brucella hemophosphoreum*, 2004
*Bruchus pisorum*, 1060
*Bryobia rubrioculus*, 222
*Bryotropha similis*, 971
Budworm control on sweet corn, 579
*Bucculatrix thurberiella*, 961, 1364, 1651
Bumble bee, capture in traps, 1442
*Busseola fusca*, 776, 1605
Busulfan, sterility induced in boll weevils with, 1195
Bux against: *Aedes nigromaculis*, 1225
corn rootworm, 1615
flea beetle, 1026

C

$^{14}$C-DDT, $^{35}$C-dieldrin against *Mucor alternans*, 1595
C$^{14}$ metabolic fate in wheat plants, 670
C-768 against mites, 1410
C-776 against mites, 1410
C-2307 against: *Brachyrhinus*, 1684
cotton leaf perforator, 1365
C-2428 against mites, 1410
C-8514 against: cotton leafworm, 610
mites, 1410
C-8874, as soil insecticide, 3
C-8874 against: cattle grubs, 1103
house fly, 892
lepidopterans, 1943
mites, 1410
C-9491 against: *Aedes nigromaculis*, 1225
*Attagenus* spp., 286
beetles, 259
cattle grubs, 1103
cotton leaf perforator, 1365
cotton leafworm, 610
*Hippelates pusio*, 1185
house fly, 892, 1925
lepidopterans, 1943
mites, 1410
pale western cutworm, 1842
*Trogoderma* spp., 1836
C-9643 against: cattle grubs, 1103
mites, 1410
C-10015, as soil insecticide, 3
C-10015 against: cattle grubs, 1104
mites, 1410
C-11044 against: cattle grubs, 1104
mites, 1410
C-11753 against: cattle grubs, 1104
mites, 1410
Cabbage aphid, control, 319, 601
tests on toxicity of insecticides to, 665
Cabbage flea beetle, insecticide toxicity to, 1025
Cabbage looper, attractants for, 1417
baiting traps with sex pheromone of, 197
behavioral response to light and gravity, 1984
control, 862
dark mutant of, 336
males and synthetic sex pheromone, 178
rating system for suitability of diets, 759
resistance to organophosphate insecticides, 646
response of male to pheromone, 1018
tests on toxicity of insecticides to, 666
traps baited with pheromone, 141
weight of larvae, 1106
Cabbage maggot, control, 1654
Cabbageworm, control, 862
Cacodylic acid, ponderosa pine trees killed with, 956
*Cadra cautella*, 364, 519, 595, 727, 1853
dichlorvos against, 288
*Cadra figuliella*, 595
Cage (s) , making insect-testing, 679
restraining, for rabbit pesticide studies, 330
to find host by ladybird beetle, 1376
to obtain uniform oviposition by *Liriomyza munda*, 655
Caged-poultry houses, fly control in, 400

*Calathus gregarius*, 935
Calcium carbonate against flies, 946
Calcium cyanide against greenhouse whitefly, 525
*Callosamia angulifera*, 872
*Caloglyphus mycophagus*, 1674
sp., 1674
*Calosoma frigidum*, 1613
*Calospasta moesta*, 102
*Calotelea marlattii*, 1023
*Campoletis perdistinctus*, host preference, 518
spectral response of, 1758
*Campoletis* sp., 327
*Campoplex frustranae*, 1137
*haywardi*, 102
sp., 1533
*Campylomma pellucida*, 765
Canadian house fly resistance, 1947
Candidate materials as potential soil insecticides, 782
*Canelomyia*, 1023
*Cantharis consors*, 102
*Canthon imitator*, 1023
*lecontei*, 1023
*Capitophorus elaeagni*, 1100
*hippophaes*, 1100
sp., 1101
Capture of: bees in traps, 1442
forest insects in blacklight lamp-equipped traps, 871
Carbamate (s), bioassay using *Daphnia magna*, 710
house fly resistance to, 138
insecticides substitutes for DDT, 509
Carbanolate against: Colorado potato beetle, 2007
gypsy moth, 156
lone star tick, 1681
tobacco flea beetle, 510
Carbaryl, and honey bee mortality, 1438
antidote for poisoned bees, 1833
contaminated pollen, toxicity to honey bees, 475
effect on grain sorghum, 1517
Carbaryl, indicator of oxidases in Insecta, 101
metabolism, oxidase inhibitors on, 1369
resistant strains of Egyptian cotton leafworm, insecticidal activity on, 1783
toxicity to honey bees, 1834
Carbaryl against: alfalfa weevil, 120
bean and alfalfa bugs, 60
bluegrass billbug, 25
boll weevil, 266, 1342
budworms, 580
cat-facing, 1026
chiggers, 374
clover head weevil, 257
Colorado potato beetle, 2007
corn pests, 384, 387, 1615, 1665
cotton leaf perforator, 1365
cotton leafworm, 611
*Daphnia*, 711
European corn borer, 250
fall armyworm, 384
fall cankerworm, 1971
flea beetle, 1026
fruit flies, 1748
gypsy moth, 156
leafhopper, 980
lone star tick, 1681
*Sciopithes obscurus*, 1700
spittlebug, 718
thrips, 1254
tobacco flea beetle, 510, 1340
tomato pinworm, 1482
tussock moth, 514
*Typhlodromus fallacis*, 1441
*Typhlodromus occidentalis*, 1529
Carbaryl + methyl parathion against: bollworm, 1358
cotton leaf perforator, 1365
tobacco budworm, 1358
Carbaryl + molasses against budworms, 580
Carbaryl + p-peronyl butoxide against *Tarentula kochi*, 1845
Carbaryl + Triton against spittlebug, 718
Carbofuran (see also NIA)
Carbofuran, residues in alfalfa, 589
uptake and translocation, 1301
Carbofuran against: *Aedes nigromaculis*, 1225
alfalfa weevil, 120, 1269, 1603
aphids, 188
apple insects, 182
bean and alfalfa bugs, 60
black vine weevil, 1698
budworms, 581
cabbage pests, 320, 604, 1655
citrus red mite, 1590
codling moth, 1458
cole crop pests, 863
*Conotrachelus hicoriae*, 2011
corn rootworm, 1615
cotton insects, 1325
cotton leaf perforator, 1365
greenhouse whitefly, 523
*Diatraea grandiosella*, 1496
lepidopterans, 1943
Mexican bean beetles, 1221
nematodes, 187
pale western cutworm, 1843
potato beetles, 188
rice green leafhopper, 1959
*Sciopithes obscurus*, 1700
seed-corn maggot, 1332
southern potato wireworm, 512
spittlebug, 717
thrips, 937, 1254
tobacco flea beetle, 510
tomato pinworm, 1482
tussock moth, 514
wireworms, 1884
Carbofuran in: flooded rice, 239
laying hens, 1108
Carbon dioxide: chilling and staining, effects on codling moth, 1775
in mangos and oranges against Mexican fruit fly, 1917
to immobilize Mediterranean fruit fly, 1962
Carbophenothion, effect on grain sorghum, 1517
Carbophenothion against: alfalfa weevil, 120
cat-facing, 1026
clover head weevil, 257
*Eriophyes insidiosus*, 1552
greenbug, 1930
rust mites, 1757
*Sciopithes obscurus*, 1700
tussock moth, 514
yellow spider mite, 1435
Carboxylesterase in *Musca domestica*, 394
*Carcinops pumilio*, 86
Carmine spider mite, resistance, 545
tolerance to malathion, 567
*Carneocephala flaviceps*, 1992
Carpet beetle feeding, 1011
*Carpophilus hemipterus*, 1668
Carrot (s), effect of uptake of endrin, 1651
fensulfothion and thionazin residues in, 1304
lygus bug feeding on seed, 959
Casein wheat germ diet for tobacco budworm rearing, 1743
Cat-facing injury, reduction, 1026
*Catharosia* n. sp., 1023
*Cathartus quadricollis*, 729
*Cavariella* sp., 1101
Cattle, hair-shedding contribution to loss of insecticidal deposits from, 1338
Cattle manure, influence of insects in, 1121
polyvinyl chloride for face fly control in, 1271
Cattle grub, control, 1233, 1237
*Cecidomyia* sp., 1023
CELA K-37, K-41 against house flies, 275
Cela K-37, K-41, K-43, K-159 against mites, 1410
CELA K-159 against cattle grubs, 1103, and house flies, 275
Cela 6782 against: cotton leafworm, 612
*Spodoptera littoralis*, 677
*Celama sorghiella*, 519
*Celeria lineata*, 103
Cellulose sponge wicks to water or feed insects, 1021
*Cenopalpus pulcher* control, 1, 310
*Cephus cinctus*, 993
*Ceramica picta*, 519
*Cerasphorus cinctus*, 872
*Ceratitis capitata*, 106, 352, 454, 662, 908, 1093, 1175, 1319, 1354, 1674, 1746, 1813, 1830, 1917, 1962
*Ceratomia catalpae*, 872
Cereal, wheat-stem maggot against, 1426
Cereal leaf beetle, *Anaphes flavipes* development in eggs, 128
*Tetrastichus julis* parasite of, 1968
*Ceroplastes floridensis*, 1998
*Chaetocnema confinis*, 360
*Chaetophlepsis* n. sp., 1964
*Chaetopsis debilis*, 783
*Chaetosiphon fragaefolii*, 1100
sp., 1101
Chalcidoidea, parasitization of puncturevine weevils by, 827
Chamber for management of circadian rhythms, 1676
Changes of Japanese beetle attractant mixtures, 1475
*Charepis* sp., 733
*Chauliognathus marginatus*, 102
*Cheletogenes ornatus*, 78
*Cheletomimus berlesei*, 78
*Chelonus texanus*, 327
Chemagro 5461, direct- contact spray, 783
Chemical (see Methods)
Chemosterilants (see Methods)
Chemosterilization of *Culex pipiens*, 248
Cherry fruit fly, malathion against, 1693
Chevron CS-5942 against gypsy moth, 156
Chevron 9006 against: cotton insects, 464
mites, 1410

Chevron RE (see RE)
Chickens, chronic toxicity of Dursban in, 319
northern fowl mite effects on, 1885
Chicken lice, resin strands to control, 263
Chigger, screening to control, 373
*Chilo partellus*, 1790
*zonellus*, 1790
*Chionodes fuscomaculella*, 971
*Chirothrips crassus*, 79
*Chlamisus cribripennis*, 1364
sampling, 1361
Chlordane, effect on cockroach nerves, 1732
in soils, 634
residues in sugarbeets, 1143
Chlordane against: alfalfa weevil, 120
bollworm, 1569
bluegrass billbug, 25
cabbage maggot, 1655
*Lachnosterna consanguinea*, 1663
odorous house ant, 1972
tobacco budworm, 1569
Chlordane + toxaphene against budworms, 580
Chlorfenvinphos against flea beetle, 1026
Chlorinated hydrocarbons, toxicity to cotton insects, 1568
Chlorobenzilate against: chiggers, 375
*Eriophyes insidiosus*, 1552
rust mites, 1757
yellow spider mite, 1435
Chloropicrin, *Cryptolestes* spp. susceptibility to, 940
Chloropropylate against yellow spider mite, 1434
*Chlorops* sp., 1023
Chlorphenamidine, against flea beetle, 1026
metabolism and translocation in grapefruit seedlings, 1306
Chlorphoxim, direct-contact spray, 783
Chlorphoxim against: *Attagenus* spp., 287
Colorado potato beetle, 2007
cutworms, 606
Chlorthion against fruit flies, 1747
Cholinesterase, inhibition in *Tribolium castaneum*, 1628
reactivators as antidotes on honey bees, 1831
*Choristoneura fractivittana*, 972
*fumiferana*, 1966
*fumiferana*, metepa chemosterilant for, 1394
*occidentalis*, damage to Douglas-fir cones by, 1804
*occidentalis*, reduction in fertility, 1619
*rosaceana*, 972
Chronic toxicity of Dursban in chickens, 319
Chrysanthemum, survival of *Liriomyza munda* eggs in, 1359
*Chrysanthemum morifolium*, growth response to diazinon and demeton root drenches, 1446
*Chrysaspidia contexta*, 972
*Chrysocharis ainesliei*, 1626
*parksi*, 1627
sp., 1533
*Chrysomphalus aonidum*, 1998
*Chrysomya megacephala*, 19

Hempa against: *Culex pipiens*, 248
tobacco budworm, 984

Hens, carbofuran in, 1108
chicken lice control on, 263
Rabon residue detection in manure, 1355
Heptachlor, effect on cockroach nerves, 1732
in soils, 625, 634
poisoning, reproduction of braconid after, 1348
Heptachlor against: alfalfa weevil, 120
bollworm, 1569
house fly, 471
*Lachnosterna consanguinea*, 1663
*Pleocoma*, 1574
tobacco budworm, 1569
Heptachlor epoxide, effect on cockroach nerves, 1732
Heptachlor epoxide against: bollworm, 1569
tobacco budworm, 1569
Hercules 3964-D against mites, 1410
5727 against *Daphnia*, 711
7522H against *Daphnia*, 711
8717 against *Daphnia*, 711
9007 against lone star tick, 1681
9699 against *Daphnia*, 711
9975 against house flies, 275
10016 against cattle grubs, 1104
11771-C against mites, 1410
Hercules 13462 against: bean and alfalfa bugs, 59
cattle grubs, 1105
mites, 1410
thrips, 937
Hercules 13842 against mites, 1410
13843 against mites, 1410
Hercules 14469 against: cattle grubs, 1104
mites, 1410
Hercules 14504 against mites, 1410
Hercules 17200 against: cattle grubs, 1104
mites, 1411
Hercules H-17413 against cabbage maggot, 1654
Hercules H-18526 against cabbage maggot, 1654
Herd treatment with crotoxyphos, 671
*Hermetia illucens* control in poultry manure, 1786
*Herpetogramma licarisalis*, 1469
*Heterocampa bilineata*, 1613
*biundata*, 872, 1613
*guttivitta*, 1613
*guttivitta*, feeding behavior, 1201
*pseudotsugata*, 1257
*umbrata*, 872
*Heteropogon lautus*, 1023
Heteroptera, 1345, 1543
*Heterotylenchus autumnalis*, parasite of face fly, 1922
Hibernation of alfalfa weevil, 347
Hickory, elm spanworm rearing on, 1581
shuckworm, activity from trap collections, 1610
*Hippelates*, susceptibilities to insecticidal deposits, 1186
*Hippelates pallipes*, 1186
*pusio*, 1186
*pusio* and insecticidal fogs, 1184
*Hippodamia convergens*, 102, 815
*Histiostoma* sp., 1674
Hoechst 2838 against bean and alfalfa bugs, 59
*Hofmanophila pseudospretella*, 595
Holding, cages, pink bollworm, 1012
containers for sterile Tephritidae, 908
*Homoeosoma electellum*, 1358
Homoptera, 125, 135, 460, 522, 530, 582, 599, 601, 647, 716, 733, 938, 964, 998, 1032, 1039, 1077, 1099, 1146, 1198, 1321, 1333, 1345, 1464, 1489, 1498, 1543, 1661, 1712, 1822, 1929, 1958, 1974, 1991, 1999
Honey bee, American foulbrood disease control in, 204
as pollinator, 148
attraction of drone in mating response, 641
brood-rearing capability, 215
capture in traps, 1442
collecting and counting, 327
disease control by fumigation, 1062
mandibular gland extirpation on acceptance of, 714
mortality, 1437
nosema-infected, behavior, 1539
poisoned, cholinesterase reactivators as antidotes, 1831
pollen trap for, 1350
toxicity of contaminated pollen to, 475
*Horismenus microgaster*, 1137
Hormones to control livestock arthropods, 878
Horn fly, attraction to treated steers, 323
biological and ecological investigations of, 1121
Horn fly, control: by ULV aerial applications, 1915
in New Jersey, 1924
on cattle, 1123
Horn fly control with: crotoxyphos, 671
dichlorvos-impregnated strips, 1688
dust bags, 946
malathion and fenthion, 736
Horn fly, olfactometer for measuring host attraction in, 1335
reproduction, 930
Horses, *Tabanus quinquevittatus* on, 151
Host, insect asynchrony, control by, 1966
preference of *Campoletis perdistinctus*, 518
range of western corn rootworm larvae, 800
plant choice of sugarcane borers, 988, 989
House fly, air barriers against entrance, 29
as test insect, 229
–circadian rhythm in susceptibility, 159
contact sprays against, 275
House fly, control: by chemosterilants, 213, 1167
swine-finishing units, 171
of larvae in cow manure, 853
of larvae in poultry houses, 891
House fly, DDT resistance in, 1768
diet use to assay *Bacillus thuringiensis* activity, 1987
fecundity and density, 1020
forced air for separating pupae, 331
immersion technique and, 883
induction of enzymes by DDT and dieldrin, 1091
insectides in sugar baits to control, 2000
malathion toxicity to, 424
metabolism of nucleic acids and proteins in, 1777
microsomol oxidation, 1807
mutants, 1385
House fly, resistance to: carbamates, 138
to naphthalene, 787
House fly, saline solution for sperm, 1006
sesamex effect on, 470
sex separation, 1451
sterile-male releases to control, 379
sterility by chemicals, 1716
sterilizing, 1744
synergists for pyrethrins against, 1379
toxicity effects of malathion and malaoxon on, 1621
traps for, 672, 1030
House mosquito, autochemosterilization of, 648
*Hyadaphis pseudobrassicae*, 1100, 1498
sp., 1100
*Hyalopterus atriplicis*, 1058, 1101
sp., 1100
*Hybomitra epistates*, 153
*h. hinei*, 153
*lasiophthalma*, 154
Hydrocarbons, mosquito control agents from, 1118
Hydrochloride against lepidopterans, 1943
*Hylemya brassicae*, 1718, 1754
*platura*, 1332
*Hylobius*, 1183
*pales*, 341, 872, 995
*Hymenia recurvalis*, 519
Hymenoptera, 128, 145, 148, 204, 215, 299, 302, 304, 327, 328, 343, 475, 518, 587, 620, 641, 656, 675, 681, 714, 719, 740, 993, 1033, 1062, 1114, 1205, 1250, 1292, 1322, 1345, 1348, 1350, 1390, 1437, 1442, 1534, 1539, 1758, 1831, 1834, 1889, 1891, 1934, 1968, 1971, 1990, 1993
*Hypera meles*, 256
*postica*, 119, 189, 242, 303, 347, 440, 554, 586, 589, 652, 674, 681, 682, 719, 761, 897, 921, 928, 1010, 1268, 1329, 1330, 1374, 1523, 1602, 1663, 1689
*Hyperetis amicaria*, 872
*Hyperomyzus lactucae*, 1100
sp., 1101
*Hyphania cunea*, 872
*Hypoderma bovis*, 1105, 1237
*lineatum*, 1105, 1233, 1237
spp., 1103
*Hyposoter pilosulus* development in salt-marsh caterpillar, 299
sp., 327
*Hyssopus thymus*, 1137
*Hysteroneura setariae*, 1100

I

*Icerya purchasi*, 742, 1998
*Ichthyura inclusa*, 872
Imidan against: alfalfa weevil, 120, 1268
apple insects, 182
bean and alfalfa bugs, 59

*Brachyrhinus*, 1684
cat-facing, 1026
chiggers, 375
clover head weevil, 257
codling moth, 1458
Colorado potato beetle, 2007
common cattle grub, 1236, 1239
cotton leafworm, 610, 1365
flea beetle, 1026
greenhouse whitefly, 523
ladybird beetle, 1687
*Sciopithes obscurus*, 1699
tobacco flea beetle, 510
tomato pinworm, 1480
tussock moth, 514
Imidan-Trithion against apple insects, 182
Imidazole, mothproofing with, 71
Immersion technique and house flies and cockroaches, 883
Imported cabbageworm, gamma irradiation to sterilize, 1008
mutilation, 1114
parasite, introduction against, 304
parasite, rearing, 1993
Imported fire ant, and Nantucket pine tip moths, 1250
food acceptance, 145
Fur-Ag carrier for bait for, 1990
Indian-meal moth, and low temperature, 1081
malathion effects on, 902
mortality, 570, 817
protection from virus, 1024
Inhibition of male accessory glands of *Aedes aegypti*, 745
Injury to citrus by mite, 1996
*Inostemma* sp., 1023
Integrated fly control, 400
Integrating sterile-male releases for house fly control, 379
Integration of *Phytoseiulus* with predators to control two-spotted spider mite, 1177
Introduction of *Apanteles rubecula* into U. S. 304
Insecta, oxidases in, 101
Interrelationships among alfalfa insects, 192
*Inveria* sp., 1023
Iodine, antifertility effects in screwworm flies, 1851
*Ips calligraphus*, development on foliage-based diets, 1797
*lecontei*, mortality, 956
*Iridomyrmex humilis*, 102, 740
Irradiation (see Methods)
Isobenzan, effect on cockroach nerves, 1732
Isobenzan against: alfalfa weevil, 120
bollworm, 1569
*Lachnosterna consanguinea*, 1663
tobacco budworm, 1569
Isobenzan + parathion against corn pests, 387
Isodrin, effect on cockroacn nerves, 1732
Isodrin against: bollworm, 1569
house fly, 471
tobacco budworm, 1569
Isodrin + sesamex against house fly, 471
Isolan against *Daphnia*, 711
*Itoplectis conquisitor*, 1137
*quadricingulatus*, inundative release of, 1390
*Ixodes ricinus*, 1214
*Iziphya* sp., 1101

J

Japanese beetle, as lures, 1001
attractants for, 832
changes of attractant mixtures, 1475
dispensing soil and water to, 992
lures for, 41, 663, 1289
mating competitiveness, 438
methyl cyclohexanepropionate attractant for, 276
phenethyl propionate attractant for, 1727
rearing in pans, 859
screening candidate chemosterilants, 458
sex attraction in, 905
traps baited with lures to capture bees, 1442
Jumping cocoons, value to *Bathyplectes anurus*, 586
Juvenile hormone, activity of sesamex, 540
compounds related to, 1858

K

*Keiferia lycopersicella*, 1479, 1484, 1531
Kepone, effect on cockroach nerves, 1732
Kepone against: southern potato wireworm, 512
tobacco budworm, 1569
*Kleidotoma* sp., 1023

L

*Lachnosterna consanguinea*, toxicity of pesticides to, 1662
*Lacinipolia stricta*, 519
Ladybird beetle, cage to find host, 1376
Landrin against: corn rootworm, 1615
flea beetle, 1026
Lannate, reduction in fertility of *Choristoneura* by, 1619
Lannate against: bean and alfalfa bugs, 59
budworms, 580
cabbage aphid, 604
cotton leafworm, 610
pale western cutworm, 1842
slugs, 306
thrips, 937
Lannate + chloroneb against thrips, 937
Lannate + duPont sticker, 581
Larval migration of western corn rootworm, 325
*Lasioderma serricorne*, 594, 727, 1069, 1232, 1263, 1853, 1860, 1867, 1980
*Lasioglossum zonulum*, 1445
*Laspeyresia caryana*, 1610, 2010
*pomonella*, 181, 306, 530, 661, 866, 894, 912, 9'5, 986, 997, 1003, 1008, 1148, 1457, 1521, 1775
*Latheticus oryzae*, 594
Lead arsenate against: apple insects, 182
codling moth, 895
Lead arsenate + carbaryl against codling moth, 895
Lead arsenate + ryania against codling moth, 895
Leaf consumption of tobacco hornworm larvae, 1938
Leaf miner, rearing, 2009
Leafhoppers, dispersal from clover to beans, 1057
in soybean fields, 1991
Leaves, used to estimate populations of aphids, 1159
*Leibunum* sp., 935
*Lema trilineata*, 102
*Lemophagus curtus*, 1968
Lepidoptera, 15, 141, 155, 163, 179, 181, 197, 237, 250, 272, 280, 288, 295, 296, 301, 304, 306, 307, 326, 334, 335, 336, 338, 363, 370, 385, 408, 415, 443, 463, 513, 535, 537, 558, 564, 579, 605, 609, 613, 650, 656, 658, 661, 666, 667, 676, 684, 686, 731, 759, 766, 776, 779, 803, 820, 886, 841, 844, 848, 862, 866, 894, 902, 910, 912, 915, 943, 960, 984, 986, 987, 988, 989, 994, 997, 1003, 1004, 1008, 1011, 1012, 1017, 1019, 1024, 1031, 1048, 1081, 1106, 1135, 1148, 1162, 1187, 1201, 1205, 1226, 1228, 1241, 1255, 1257, 1260, 1281, 1296, 1324, 1325, 1328, 1340, 1345, 1357, 1358, 1362, 1364, 1366, 1394, 1406, 1417, 1430, 1454, 1479, 1485, 1492, 1495, 1518, 1531, 1544, 1562, 1568, 1578, 1581, 1605, 1610, 1613, 1619, 1633, 1665, 1677, 1679, 1692, 1700, 1701, 1714, 1743, 1762, 1775, 1783, 1788, 1790, 1799, 1802, 1804, 1828, 1842, 1873, 1881, 1900, 1909, 1938, 1941, 1956, 1963, 1965, 1966, 1969, 1970, 1976, 1981, 1984, 2007
method of separating desired species, 1371
Lepidopteran (s), attacking cotton, toxicity of insecticides to, 1943
larvae, GL lamps on traps against, 1974
Lepidopterous eggs, determining parasitism of, 1367
Lepidopterous sex attractants, 969
*Lepidosaphes beckii*, 1998

Melon fly, attractiveness of cue-lure to, 339
holding containers for, 908
location effects on responses, 869
mortality, 106
rearing, 2002
toxicity relationships in, 1746
*Menacanthus stramineus*, 263
Menazon against: cattle grubs, 1105
pea aphid, 1588
*Menopon gallinae*, 263
Mepazol against cotton leafworm, 612
*Meromyza americana*, 1426
spp., 1427
*Mesograpta marginata*, 1023
sp., 103
*Mesostenus longicaudis*, 1023
Mesurol against: alfalfa weevil, 120
tussock moth, 514
yellow spider mite, 1434
Metabolic fate of $^{14}$C-dieldrin in wheat plants, 670
Metabolism of: chlorphenamidine, 1306
diazinon in alfalfa, 874
formetanate in orange seedlings, 615
insecticide, 693
insecticide in house fly, 1510
parathion by *Rhizobium*, 1155
Metacid against cotton leafworm, 612
Metal chelates, bean leaves treated with, 722
Metaldehyde against slugs, 306
*Metarrhizium anisopliae*, 1674
*Metaseiulus occidentalis*, 1521
*occidentalis*, overwintering, 340
*Metasyrphus weidemanni*, 531
*Meteorus* spp., 1964
Metepa, against tobacco budworm, 984
chemosterilant for spruce budworm, 1394
effect on *Musca sorbens*, 213
sterilization of mosquitoes by, 1169
Methiocarb against slugs, 306

METHODS
Ability of *Nephotettix* to transmit rice virus, 582
Abundance and distribution of pine parasites, 1135
Acaricide in orange seedlings, 615
Acceptance of honey bee, mandibular gland extirpation effect, 715
ACTIVITY OF: chemosterilants in house fly sterilization, 1745
compounds on yellow mealworm, 1858
cranberry fruitworm at BL, 1701
METHODS
*N*-acylcarbamates on Egyptian cotton leafworm, 1783
Adaptation of braconid parasite to face fly, 749
Adhesive materials and host location effect on *Trichogramma parasitism*, 1892
Aggressiveness in mating of screwworms, 1611
Analysis of boll weevil populations, 1505
Antidotes for poisoned bees, 1832
Antifertility compound for screwworm, 491
Artificial egging system for European cherry fruit fly, 1413
Association of green stink bug with disease organisms of soybeans, 200
Atmospheric gases, effect on weevils, 1926
ATTRACTANT FOR: apple maggot, 467
European chafer, 168
Japanese beetle, 277, 1475
Attraction of horn flies to treated steers, 323
Attractiveness to melon fly of cue-lure, 339
Bait for oriental fruit moth attractant for lesser peach tree borer moths, 1976
Bait sprays, reducing apple maggots populations with, 1879
Barriers against house fly entrance, 29
BEHAVIOR OF: alfalfa weevil, 1010, 1690
Argentine ant, 740
*aulacophora foveicollis*, feeding, 333
face fly, mating, 207
*Lygus hesperus*, 809
nosema-infected honey bees, 1539
*Tetrastichus incertus*, 303
*Typhlodromus mcgregori*, 222
Behavioral responses of cabbage looper and fall armyworm larvae to light and gravity, 1984
BIOASSAY (S): of plants, 302
using *Daphnia magna*, 711
Bioassaying sex pheromone, 295
BIOLOGICAL: characterization of overcrowding mosquito larvae, 1738
control of nematodes in mosquito larvae, 175
control agents, puncturevine weevils as, 827
Carbamates, screening for toxicity against slugs, 305
Check method measured against *Typhlodromus*, 1617
Chelating agent effect on tobacco hornworm, 887
CHEMICAL (S): against *Pleocoma* larvae, 1573
factors of mosquito larvae, 90
messengers to manage western pine beetle, 1132
thrips control, 1253
CHEMOSTERILANTS AGAINST: Japanese beetle, 458
spruce budworm, 1393
tobacco budworm, 984
two-spotted spider mite, 357
Chemosterilized *Oncopeltus*, mating and mortality of, 1695
Chigger control on turkeys, 374, 377
Choice of host plants by sugarcane borers, 988, 989
Coleopteran ovicides, synthetic juvenile hormones as, 1231
METHODS
Collecting tobacco budworms and bollworms by light traps, 1229
Comparison of *Eucelatoria* species, 1469
COMPETITIVENESS OF: Mediterranean fruit flies, 1175
sperm in fall armyworms, 1799
Compounds to lure Japanese beetle, 42
Concentrations of petroleum oil on cotton foliage, 426
Cone contents of short-leaf pine, 564
Constituents of cotton bud, 751, 754, 1819
Contact toxicity of insecticides to cabbage flea beetle, 1025
Contaminated pollen and honey bees, 475
Control agents against *Pleocoma* larvae, 1573
CONTROL: by asynchrony, 1966
sterile insects, 269
chemical, of black turpentine beetle, 104
chemical, of fruit tree false spider mite, 1
programs and boll weevils, 1084
CONTROL OF: *Adelges cooleyi* on Christmas trees, 150
alfalfa weevil, 120, 440, 554, 1330, 1374, 1603
American foulbrood disease, 204
aphids, 531, 2011
apple pests, 1528
*Bacillus thuringiensis* with diet, 1987
bean insects and mites, 1486
beet leafhopper and green peach aphid to suppress curly top and beet western yellows, 493
bluegrass billbug, 24
body lice, 861
boll weevil with sprays and droplets, 366
bollworm, 1357
bollworm and budworm with molasses, 767
budworm on sweet corn, 580
cabbage aphid, 319, 603
cabbage maggot, 1654
*Cadra cautella*, 288
cattle grub, 1237
cherry fruit fly, 1694
chicken lice, 263
citrus red mite, 1590, 1631
clover head weevil, 257
codling moth, integrated, 894
codling moth on pears, 1458
cole crop pests, 863
common cattle grub, 1233
*Conotrachelus hicoriae*, 2010
corn earworm, 416, 1665
corn rootworm larvae, 1615
cotton pests, 629, 849, 1074, 1324, 1365
*Culex pipiens*, 248
dark rice field mosquito, 1986
*Diatraea grandiosella*, 1496
elm leaf beetle, 1327
*Eriophyes insidiosus* on peach mosaic virus, 1551
European corn borer, 385
*Eurytoma amygdali*, 1934
face fly, 1124
face fly larvae in cattle manure, 1272
fall armyworm, bermudagrass resistance affecting, 1981
flies in poultry houses, 1734

METHODS
flies, program, 400
flies with dust bags, 946
fruit tree false spider mite, 310
garden symphylan, 1718
grape phylloxera, 125
greenbug, 1537, 1712, 1930
greenhouse whitefly, 523, 599
gypsy moth, 15
*Hermetia illucens* in poultry manure, 1786
*Heterocampa*, 1613
honey bee diseases, 1062
horn fly, 671, 736, 1124, 1688, 1915
hornworms with blacklight traps, 1188
CONTROL of house fly: in New Jersey, 1924
in poultry houses, 892
in swine-finishing units, 172
larvae, 853
with dry sugar baits, 2000
with Metepa, 213
with sterile-male releases, 379
Control of imported fire ant, 1990
CONTROL OF INSECTS: in dairy cows, 1730
in dichlorvos-treated dairy cows, 1729
in peanut storages, 817
on apple, 182
on livestock, 548
on sweet corn, 382
CONTROL OF: livestock arthropods, 878
lone star tick, environmental, 505
maggots in fruit, 496
Mexican bean beetle, 1221
Mexican fruit fly, 1917
mosquitoes, 1118, 1172
pale western cutworm, 1842
pea aphid, 1589
pink bollworm, 1226
red-banded leaf roller by sex pheromone, 1165
rice green leafhopper, 1959
rice insects, 1867
seed-corn maggot, 1332
southern pine beetle, 1016
spider mites on grapevines, 308
*Spodoptera littoralis*, 609
sweetclover weevil, 1356
*Tetranychus urticae* with seaweed spray, 1717
three-cornered alfalfa hopper, 979
thrips on cotton, 937
thrips on peanuts, 1253
tobacco budworm, 1357
tobacco flea beetle, 509, 1340
of tomato pinworm, 1480
two-lined spittlebug, 716
two-spotted spider mite, 359, 639, 1027, 1177, 1708
western corn rootworm, 385
wireworm on potatoes, 1883
yellow spider mite on pear, 1434
Corn fields, role of weeds in, 195
Cultural practice effects on corn rootworms, 934
Culture of orange tortrix, 1788
DAMAGE BY: *Heliothis* to cotton yield, 613
insects to potatoes, 186
DAMAGE TO: alfalfa by spotted alfalfa aphid, 313
apple trees by codling moths, 1003
cotton by bollworm, 1328
METHODS
Douglas-fir cones by *Choristoneura*, 1805
stink bug, test for, 982
Dechlorination of DDT, 757
DECREASE of: whitefly populations, 1378
rhizobial populations, 1155
Degradation of formetanate by rat liver, 1691
Dehydrochlorination of TDE by Mexican bean beetle, 1723
Deposits from aerial application of insecticides and pesticide drift, 1982
Detection methods for sex pheromone in red-backed cutworm, 841
Detection of mycotoxin F-2 in insects, 413
Determining method of *Apanteles* mutilating imported cabbageworm, 1114
Determining parasites species attacking aphids, 733
Development of *Anaphes flavipes*, 129
Development of *Hyposoter pilosulus*, 300
Diapause in maize stemborer, 1605
Dielectric heating, mangoes treated by, 1977
DIET, artificial: fall cankerworm reared on, 1970
for corn earworm, 1969
of cabbage looper larvae, 1106
of pecan bud moth, 650
rearing codling moth on, 1148
DIET: cotton, of bollworm, 1965
effect of biologically active substances in, 1518
foliage-based, *Ips calligraphus* and, 1797
DIET FOR: Angoumois grain moth rearing, 844
*Bacillus thuringiensis* control, 1987
boll weevils, 990
cabbage loopers, rating, 759
*crambus trisectus*, 1579
melon fly, support, 2002
morman cricket, 96
olive fruit fly, 317
orange tortrix, 1004
tagging moths of tobacco budworms, 1019
tobacco budworm rearing, 1743
DIET OF: bollworm, gossypol in, 1544
corn earworm, retention, 731
fall armyworm, retention, 731
*Periplaneta americana*, 1795
pollen and dandelion fed honey bees, 215
tobacco budworm, gossypol in, 1544
tobacco hornworms, artificial, 535
Differential injury to alfalfa by potato leafhopper, 1077
Differentiating biotypes of spotted alfalfa aphid, 1822
DISTRIBUTION AND: abundance of stored-product insects, 591
abundance of *Trogoderma* spp., 1553
seasonal abundance of leaf miners, 1623
settling of micronized dust, 1749
DISTRIBUTION OF: cabbage looper, 1106
cotton fields and boll weevil, 1907
garden symphylan, 390
*Typhlodromus mcgregori*, 222
Drift reduction with spray thickeners, 1314
DUST: bags, fly control with, 946, 1123
corn earworm control by, 1665
METHODS
distribution and settling of micronized, 1749
Dye for corn earworm, 1976
Dynamics of alfalfa weevil eggs, 242
Dynamics of *Tetranychus urticae* populations, 722
Early cutting of corn to discourage corn rootworms, 976
Ecological research furthered by $^{90}Sr$ tagging, 1635
Ecology of tomato pinworm, 1531
EFFECT of: *Bacillus thuringiensis* on pink bollworm, 1828
*Heliothis* damage to cotton yield, 613
insecticides on *Tarentula kochi*, 1844
nitrogen fertilization on cotton insects, 1219
Effectiveness of compounds on *Anopheles* eggs, 1151
Effectiveness of green electroluminescent lamps for attracting stored-product insects, 726
EFFECTS of: gamma radiation on gypsy moth, 164
grape phylloxera on grape cultivars, 136
mites on chickens, 1886
prevention of spinning in silkworm, 334
sesamex on house fly, 470
Efficiency of grid stratification, 1865
Egg counts of bagworms, 910
Electron microscopic and autoradiographic study, 795
Eliminating *Glugea gasti* from boll weevils, 1638
Emergence of peach tree borer in North Carolina, 1700
Estimating food consumption of *Pieris rapae*, 820
EVALUATION OF: aldicarb on orange trees, 651
aliphatic amines against mosquitoes, 1473
chemosterilants against tobacco budworm, 984
malathion as raisin protectant, 1503
FATE OF: carbofuran in laying hens, 1108
formetanate, 10
radioactive iodofenphos, 693
TMAC in flies, 456
Fecundity of house fly, 1020
Feed additive for control of house fly, 853
FEEDING: behavior of alfalfa weevil larvae, 1689
*Aulacophora foveicollis*, 333
by *Geocoris punctipes* on plants, 1911
dairy cows treated silage, 1525
mites on liquids, 1672
FEEDING OF: clothes moth and carpet beetle, 1011
*Heterocampa guttivitta*, 1201
imported fire ant, 145
tarnished plant bug on soybean, 254
tobacco hornworm larvae on tobacco, 1938
FEEDING RESPONSE OF: alfalfa weevil to plant species, 302
sweetclover weevil, 1079
Feeding rhythm of gypsy moth larvae, 1454
FERTILITY: and fecundity of *Dermacentor variabilis*, 1676

METHODS
Mediterranean fruit fly, 1248
FIELD: cage assessment of *Trichogramma*, 1292
screening tests and sex attractants, 970
studies of food preference of moth, 1258
tests with sterile codling moths, 912
Flotation method to determine weevil infestation in peas, 1061
Fluorescence of diseased yellow mealworm, 2004
Fluorescent: pigment to measure spray coverage, 769
powder for deciduous fruit moth marking, 338
powders and Mediterranean fruit fly, 454
Fly larvae control, Gardona for, 1421
Fogs and *Hippelates*, 1184
Forage, decline of tetradifon and oxythioquinox on, 1514
FUMIGATION OF: fruits and vegetables infested with fruit flies, 1093
hay bales with methyl bromide, 900
Gamma irradiation and imported cabbageworm, 1008
Granulosis virus, protection of Indianmeal moth from, 1024
Growth response of chrysanthemum to diazinon and demeton root drenches, 1446
HABITS OF: alfalfa weevil, 347
maize weevil, flight, 1587
Height of BL traps effect on moth catches, 1678
High-amylose corn breeding, 1255

*Stethorus punctum*, cage to find host, 1376
acaricide and insecticide toxicity to, 1686
Stink bug damage, test for, 982
*Stomoxys calcitrans*, 86, 400, 574, 672, 878, 1666, 1682, 1730
gamma irradiation of, 574
Stored-product insects, and dichlorvos, 1263
attracting with green electro-luminescent lamps, 726
distribution and abundance, 591

fumigant potential of GC-10033 against, 1979
light effectiveness in attracting to traps, 1853
Strawberry, parasitization of whiteflies on plants, 1377
resistance to mites, 1855
Streptomycin and nutrient levels, 449
Strobane against: cotton leafworm, 610
lepidopterans, 1944
Strobane + DDT + methyl parathion against bollworm and tobacco budworm, 767
Strobane + monocrotophos against bollworm, tobacco budworm, 767
Strontium-90 and Strontium-90 + carbon-14, radiolabeling *Dermacentor* with, 1635
Stump sprays for control of weevils, 341
Styrofoam reaction to insecticides, 998
Sublethal doses of systemic insecticides, 527
Substitutes for DDT in cotton, 848
Sugar (s), sweetclover weevil response to, 1079
Sugarbeets, residues of insecticides in, 1143
seed used to suppress curly top and beet western yellows, 493
weevil attacking, 38
yellow vein disease of, 460
Sugarcane borer, host-plant choice, 988, 989
oviposition preference, 987
trap baited with, recapture of males released from, 1341
Sulfotepp against greenhouse whitefly, 524
Sulfoxide against stable fly, 878
Sumithion against: *Aedes nigromaculis*, 1226
cotton leafworm, 610
sawflies, 622
*Spodoptera littoralis*, 677
tussock moth, 514
Sunflower (s), noctuid larvae attacking, 1031
Sunflower moths, color preference and sex attraction among, 1358
*Supella supellectilium*, 431
Supracide, residues in alfalfa, 589
Supracide against: *Aedes nigromaculis*, 1226
alfalfa weevil, 190, 1268
apple insects, 182
cabbage maggot, 1655
cat-facing, 1026
moth, 1458
cole crop pests, 864
cotton leafworm, 610
greenbug, 1930
seed-corn maggot, 1332
tobacco flea beetle, 510
tomato pinworm, 1480
Survey of boll weevil, 1041
Susceptibility of: *Attagenus* spp. larvae, 286

Viral disease in citrus red mites, 850
Virus, aphid transmission of, 484
*Vitula edmandsae serratilineella*, 595
Volck Supreme oil against yellow spider mite, 1437

W

Waste disposal and house fly control, 171
Water vapor sorption from atmosphere, 1069
Watermelon mosaic virus, transmission of, 98
Wax-bars, crotoxyphos in, 671
Wax scales, laboratory rearing, 1998
Weather and insecticides on alfalfa, 189
Weeds and corn stunt disease, 195
Weevil-infested peas, determining, 1060
Weight of cabbage looper larvae, 1106
Western corn rootworm, control, 385
host range of larvae, 800
larval migration of, 325
Western hemlock logs, *Gnathotrichus sulcatus* isolated from, 1014
Western pine beetle, management, 1132
Wheat, $^{14}$C-dieldrin metabolic fate in plants, 670
Wheat stem maggot, yield loss from, 1426
Wheat stem sawfly, light filters for studies, 993
Whitefly, parasitization of, 1377
White-fringed beetle, shaker for collecting, 1018
White peach scale, unusual infestation, 1333
White rat, Galecron metabolism in, 856
Wick, long-lasting polyethylene, 370
Winter survival of boll weevil, 1071
Wintertime soil temperatures, estimation, 1051
*Winthemia sinuata*, 1964
Wireworm, control on potatoes, 1883
WL 21959 against slugs, 306
Wood-cement deterrent to termites, 1669
Woodpeckers, control southern pine beetle, 1016

X

X-radiation against *Anaphes flavipes*, 128
X-irradiation, and piperonyl butoxide, similarity of effects on toxicity of malathion and malaoxon, 1621
in pink bollworm, 1296
on malathion toxicity, 424
*Xerophloea viridis*, 1992

Y

Yeast-spot disease, and green stink bug, 355
organism of soybeans, 200
Yellow-fever mosquitoes, acids to attract, 2002
Yellow mealworm, activity of terpenoid compounds on, 1858
Yellow mealworm, fluorescence of, 2004
tests on, 540
Yellow panels to attract apple maggot, 466
Yellow spider mite, control on pear, 1433
Yellow vein disease of sugarbeets, 460
Yield loss from wheat stem maggot, 1426

Z

Zectran against: *Daphnia*, 711
fall cankerworm, 1971
gypsy moth, 156
orange tortrix, 1789
sawflies, 622
*Tarentula kochi*, 1845
tomato pinworm, 1480
tussock moth, 514
*Zetzellia mali*, 1441
Zinophos against: bean and alfalfa bugs, 59
black vine weevil, 1699
*Brachyrhinus*, 1684
cabbage maggot, 1655
*Pleocoma*, 1574
*Sciopithes obscurus*, 1699
seed-corn maggot, 1332
thrips, 1254
*Zootermopsis angusticollis*, 1669
Zytron against *Hermetia illucens*, 1787

# JOURNAL OF ECONOMIC ENTOMOLOGY

WALLACE P. MURDOCH, *Executive Secretary*

RALPH W. BUNN, *Managing Editor* S. C. DEWS, *Editorial Associate*

4603 Calvert Road, College Park, Maryland 20740

---

**RANDALL K. LATTA, *Editor*** **GEORGE ANASTOS, *Editor***

4603 Calvert Road, College Park, Maryland 20740

---

**EDITORIAL BOARD**

P. A. DAHM, *Chairman*, Ames, Iowa (Section B, 1970)

E. J. HANSENS, New Brunswick, N. J. (Section D, 1971) M. M. BARNES, Riverside, Calif. (Section F, 1973)

FREEMAN L. MCEWEN, Guelph, Ont. (Section C, 1972) RALPH W. SHERMAN, Silver Spring, Md. (Section E, 1974)

---

A bimonthly journal devoted to the interests of economic entomology. Authors are entirely responsible for statements in the JOURNAL, whether of fact or opinion.

**Subscriptions.** Nonmembers in North America and U.S. Possessions–$23.00 per year; elsewhere–$24.00. Single copies $5.00. Deliveries overseas are not guaranteed and foreign mailings are made at the subscriber's risk.

**Missing numbers** cannot be supplied free of charge unless notice is received within 60 days after the appearance of issues concerned. The Executive Secretary will be glad to quote prices for back numbers.

**Reprints.** No gratis copies are supplied. An order form and schedule of prices which will apply to orders received before the JOURNAL is printed are sent with proof. For price schedule see BULL. ENTOMOL. SOC. AMER. 15 (2): 74–77 (June 1969).

**Business communications** and matters pertaining to subscriptions and advertisements should be sent to the Executive Secretary. Changes of address must be received 5 days prior to the month of issue to be effective for that month.

**Manuscripts** and other copy should be sent to the Executive Secretary. Authors are urged to consult "Publication Policies and Instructions for Contributors" before submitting manuscripts (BULL. ENTOMOL. SOC. AMER. 15 (2): 74–77. June 1969).

**Page charges** are **$30.00** per page, partial pages proportionately. This charge is waived for those papers of 1 printed page or less. Prompt publication of acceptable manuscripts may be secured by payment of the cost of printing and mailing (**$50.00** per page).

**METRIC CONVERSION**

Contributors of papers on laboratory studies should use the metric system exclusively. Use of the metric system in reporting the results of field studies is a desirable ultimate objective. Since it is difficult to replace immediately such standard concepts as lb/acre by the units kg/hectare, yards by meters, or miles by kilometers, the following table of conversion factors is presented.

| | | | |
|---|---|---|---|
| 1 inch = 2.54 cm | 1 $ft^3$ = 28.3 $dm^3$ | 1 cm = 0.394 in. | 1 $dm^3$ = 0.0353 $ft^3$ |
| 1 yard = 0.914 m | 1 acre = 0.405 hectares | 1 m = 3.28 ft = 1.094 yards | 1 hectare = 2.47 acres |
| 1 mile = 1.61 km | 1 lb/acre = 1.12 kg/hectare | 1 km = 0.621 mile | 1 kg/hectare = 0.89 lb/acre |
| 1 lb = 453.6 g | 1 lb/$in.^3$ (psi) = 70.3 g/$cm^3$ | 1 kg = 2.2 lb | 1 g/$cm^2$ = 0.0142 psi |
| 1 gal (U.S.) = 3.785 liters | 1 lb/gal (U.S.) = 120 g/liter | 1 liter = 0.264 gal (U.S.) | 1 g/liter = 0.83 lb/100 gal (U.S.) = 1000 ppm |

# ENTOMOLOGICAL SOCIETY OF AMERICA

## OFFICERS FOR 1970

*President*—P. O. Ritcher, Corvallis, Oregon
*President-Elect*—R. H. Nelson, Lanham, Maryland
*Executive Secretary*—W. P. Murdoch, College Park, Maryland

## GOVERNING BOARD

P. O. Ritcher, *Corvallis,* Oregon (1971)

D. C. Earley, Los Fresnos, Texas (Southwestern, 1970)
K. V. Krombein, Washington, D. C. (A, 1972)
R. E. Hamman, Ardsley, New York (Eastern, 1970)
H. F. Madsen, Summerland, British Columbia (F, 1970)
W. P. Murdoch, College Park, Maryland (Non-Voting)
R. H. Nelson, Lanham, Maryland (1972)
J. V. Osmun, Lafayette, Indiana (North Central, 1972)
D. Pimentel, Ithaca, New York (C, 1970)
K. D. Quarterman, Savannah, Georgia (D, 1971)
H. T. Reynolds, Riverside, California (Pacific, 1971)
J. S. Roussel, Baton Rouge, Louisiana (Southeastern, 1971)
C. W. Sabrosky, Washington, D. C. (Past-President, 1970)
J. F. Spears, Alexandria, Virginia (E, 1971)
C. F. Wilkinson, Ithaca, New York (B, 1972)

## BRANCH OFFICERS

### Chairmen

S. G. Gesell—University Park, Pennsylvania (Eastern)
R. T. Everly—Lafayette, Indiana (North Central)
Martin Sherman—Honolulu, Hawaii (Pacific)
S. R. Morris—New Orleans, Louisiana (Southeastern)
T. McGregor—San Antonio, Texas (Southwestern)

### Chairmen-Elect

J. L. Bean—Darby, Pennsylvania (Eastern)
H. C. Knutson—Manhattan, Kansas (North Central)
W. H. Lange, Jr.—Davis, California (Pacific)
W. G. Eden—Gainesville, Florida (Southeastern)
C. A. King, Jr.—Waco, Texas (Southwestern)

### Secretary-Treasurers

H. T. Streu—New Brunswick, New Jersey (Eastern)
J. T. Schultz—Fargo, North Dakota (North Central)
W. W. Allen—Berkeley, California (Pacific)
T. R. Pfrimmer—Leland, Mississippi (Southeastern)
H. L. McMenemy, Jr.—Dallas, Texas (Southwestern)
